

# Celebrating Mother's Day

Explore creative activities using built-in features of iPad. Designed for children ages 6–12, these six activities allow them to have fun expressing their appreciation. Share their creations on social media with #CreativityForKids.

## Send flowers

Use shapes to make a bouquet of flowers. Add some text, and send it to your mum.

**Get started:** Tap + in the top-right of the Keynote app to open the Shapes menu. Save your project as an image and share using AirDrop.

## Write a letter

Take, find or draw a picture of your mum. Add text or a voice recording to tell her how much you love her!

**Get started:** Add your photo to a slide in Keynote. Tap + to choose Record Audio or add a text box to write a message. Export as an image or a video and share using AirDrop.

## Draw your mum's portrait

Take a photo of your mum and trace lines on top of it. Delete the photo to reveal your work of art. You can also add a handwritten message.

**Get started:** Add the photo to a Keynote slide. Tap + to use the drawing tool for tracing. Save it as an image and share using AirDrop.

## Say "I Love You"

Create a short video saying "I Love You" in different languages. Use Siri to learn the words. Add Live Titles, as well as emoji and stickers for emphasis.

**Get started:** Tap ☆ in Clips, select Live Titles and choose a text style. Record yourself saying "I Love You." Then tap 🌐 to record in another language. Save the video and share using AirDrop.

## Make a video of mum's favourites

Take photos of things your mum loves, and combine them in a video using a filter effect of your choice.

**Get started:** Tap 📷 in the Clips app to import each photo from Photos. On each clip, tap ☆ to choose a filter effect.

## Design an app about your mum

Ask your mum about things like her hobbies, her favourite food and which colours she likes. Then express her story in your app project.

**Get started:** In Swift Playgrounds, add the About Me sample project. Follow the step-by-step walkthrough to customise it.
